# ABOUT US

**3 YEAR WARRANTY**

The Australian continent offers many harsh extremes, from the heat and isolation of the Simpson Desert to cold arctic winds of Bruny Island. Being avid travellers, we have experienced some of the best and worst that this country has to offer. Based on our hands-on experience, we have created a range of products that are both functional and durable.

Practicality, durability, and affordability, are at the heart of our

design principles. While uniformity in manufacture drives quality, we continue to look at ways we can adapt to each individual's needs. All of our products have the ability to be customised without sacrificing quality or incurring pricing premiums.

We are proud that all of our core manufactured product is not only designed in Brisbane Australia, it is also manufactured and assembled here.

Setting your vehicle up as the

ultimate touring machine or a fit-for-purpose workhorse takes experience to get right. We pride ourselves on finding the right solution the first time – when experience counts, count on Spinifex Manufacturing.

## ALLOY TRAYS

We offer light weight alloy trays to suit Dual Cab, Extra Cab, and Single Cab utes as required by our customers.

These trays are manufactured from extruded aluminium, making

### KEY FEATURES

- Extruded Alloy Design
- 63Mm Tube Headboard
- Alloy Drop Sides
- Anti-Rattle Latches
- Alloy Rope Rail
- Light Weight

them both exceptionally strong and light! Tubular headboards and

anti-rattle catches finish off this functional and stylish design.

## KEY FEATURES

- Heavy Duty Welded Steel Frame
- Powdercoated finish
- 63mm Tube Headboard
- Laser Cut Headboard Protector
- 3mm Bonded Alloy Floor
- Heavy Duty Alloy Drop Sides
- Anti Rattle Latches
- Steel Rope Rail
- Light Weight
- 3 Year Warranty

Spinifex Manufacturing design and manufacture heavy duty trays for Dual Cab, Extra Cab, and Single Cab vehicles. All trays can be customised to suit your needs.

Built in Australia for Australian conditions, our Tray Bodies offer many features as standard that others consider options. All of our trays are built with a fully welded

steel base frame and headboard. To save on weight, but not sacrifice strength, we bond a 3mm alloy checkerplate floor to the steel frame, using automotive grade adhesives and structural rivets. Tray sides are made from heavy-duty extruded

aluminium to save weight without sacrificing strength, and are secured with our adjustable anti-rattle latches.

The tray of each unit runs right to the edge of the frame with no lip or raised edge, making it extremely easy to load and unload.

The Spinifex Manufacturing Tray Body Plus takes all the key features of the standard body and adds a stylish lower skirt, one-piece mud guard flares and tool boxes for a more modern look. This lower skirt can be made from smooth alloy or chequer plate and can be colour matched to the tray or finished in satin black depending upon your taste.

The lower tool boxes offer convenient weather proof storage for items such as tie down traps or recovery gear. They also provide mounting opportunities for compressors and water pumps freeing up valuable tray and cabin space. The rear infill panel comes complete with a fold down utility hatch. This hatch is ideal for

## KEY FEATURES

concealing water inlets and outlets, air or electrical connections.

To complete the streamlined modern look we have replaced the rope rail from this tray with flush in-floor tie down points to ensure loads are still easily secured.
